

CAPITAL CITY 'N'GINEERS

MODEL RAILROAD CLUB

MADISON, WISCONSIN

<http://capcityntrak.org>

We are a modular N Scale model railroad club. We are unburdened by the restrictions commonplace in permanent layouts.

Our club first met in 1974 and officially adopted the NTRAK module guidelines in the late 1970s. The club owns and operates a 32-foot-long yard with five tracks per main line and two sets of modules combining a straight and corner to create a scene. One set depicts a circus and the other a golf course. The yard can be configured to sizes shorter than 32 feet if space is restricted. We have also constructed a “geezer gate” for ease of entrance into our layout.

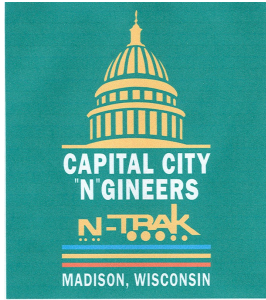

These modules are integrated with other modules owned by individual members to create layouts of various sizes and shapes, depending on the space available to us at the shows we attend. We appear in seven or eight train shows each year in the Wisconsin and northern Illinois area. Club members have also taken modules to national shows to create our club layout or to participate individually with other modelers from across the country in a multi-club layout.

Members of the club have designed and built layouts commissioned by, and featured in, ***Model Railroader*** magazine with the names “The Burlington Northern in N Scale”, and “The Wisconsin Central”.

We welcome new members [men, women, and youth]. Any model railroader interested in N Scale is invited to join. Members are encouraged, but are not required, to build NTRAK modules. Club members are happy to provide advice and assistance. Members run trains and help operate our layouts regardless of module ownership. We like to promote fun and companionship in running model trains and in helping to educate and enthuse the public about model railroading.

The club meets as needed to discuss upcoming train shows, and to conduct business, usually at supper gatherings on a train show weekend. Module building sessions are usually at members' homes.
